EDUCATION

SRM University AP <i>Bachelor of Technology in Computer Science, specialisation in AI ML</i>	8.27/10 October 2022 – May 2026
Sri Chaitanya Junior College <i>Higher Secondary Education</i>	932/1000 June 2020 – May 2022

EXPERIENCE

TDAIO (Talent Development Academy for International Organizations) <i>AI Initiative Contributor – UNESCO Hackathon 2025</i> - Proposed an AI-driven solution to bridge multilingual gaps in civic and legal literacy. - Collaborated with a diverse team to develop socially impactful, youth-led innovations.	Feb 2025
EduNet Foundation <i>Front-End Intern</i> - Engineered a responsive personal portfolio website using HTML, CSS, and JavaScript. - Optimized UI for cross-device compatibility and seamless user experience.	Jun 2024 – Aug 2024

CERTIFICATIONS

Servicenow Certified System Administrator <i>Issued by Servicenow</i>	July 2025 View Servicenow Certification
Aviatrix Certified Multicloud Network Associate <i>Issued by Aviatrix</i>	June 2025 View Multicloud Certification
Salesforce Certified AI Developer <i>Issued by Salesforce</i>	Oct 2024 View Salesforce Certification

PROJECTS

Deepfake Image Detector <i>Vision Transformer (ViT), PyTorch, Flask, React.js</i> - Engineered a PyTorch ViT-based deepfake detector achieving 93% accuracy with Netlify-hosted React frontend. - Designed Flask REST API with CORS, error handling, and optimized inference via <code>torch.no_grad()</code>. - Integrated Hugging Face processor and PIL for preprocessing in a modular, scalable backend.
RAG-Based Document Question Answering System <i>Python, NLP, Docker</i> - Built a RAG pipeline for question answering over PDFs using transformer embeddings. - Implemented semantic vector search with cosine similarity and Dockerized vector DB integration. - Developed a DistilBERT-based QA module for accurate, context-grounded answer generation.
AI Text Summarizer <i>Hugging Face Transformers, Flask, Python, React.js, Node.js</i> - Built a comprehensive Flask web application for intelligent text summarization using Hugging Face's BART model with dynamic length controls and real-time API integration. - Integrated secure RESTful API with configurable min/max length parameters (25-100 characters). - Implemented error handling for API failures, ensuring consistent user feedback during high-latency.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML, CSS.
Libraries: NumPy, Pandas, scikit-learn, OpenCV, Hugging Face Transformers.
Frameworks: PyTorch, TensorFlow, Keras, Flask.
Databases: MongoDB, MySQL.
Developer Tools: Git/GitHub, VS Code, Visual Studio, Docker.
Other Skills: API Design & Integration, REST APIs, JWT Authentication.
