EDUCATION

SRM University AP <i>Bachelor of Technology in Computer Science, specialisation in AI ML</i>	8.27/10 October 2022 – May 2026
Sri Chaitanya Junior College <i>Higher Secondary Education</i>	932/1000 June 2020 – May 2022

EXPERIENCE

TDAIO (Talent Development Academy for International Organizations) <i>AI Initiative Contributor – UNESCO Hackathon 2025</i> - Proposed an AI-driven solution to bridge multilingual gaps in civic and legal literacy. - Collaborated with a diverse team to develop socially impactful, youth-led innovations.	Feb 2025
EduNet Foundation <i>Front-End Intern</i> - Engineered a responsive personal portfolio website using HTML, CSS, and JavaScript. - Optimized UI for cross-device compatibility and seamless user experience.	Jun 2024 – Aug 2024

CERTIFICATIONS

Servicenow Certified System Administrator <i>Issued by Servicenow</i>	July 2025 View Servicenow Certification
Aviatrix Certified Multicloud Network Associate <i>Issued by Aviatrix</i>	June 2025 View Multicloud Certification
MongoDB Certified Associate Developer <i>Issued by MongoDB University</i>	April 2025 View MongoDB Certification

PROJECTS

Lost and Found Management System <i>MERN Stack (MongoDB, Express.js, React.js, Node.js)</i> - Built a full-stack web application allowing users to securely report, search, and claim lost or found items. - Implemented JWT-based authentication to safeguard user sessions and access control for protected routes. - Enabled fast search and advanced filtering by category, date, and location using React state management.
Deepfake Image Detector <i>Vision Transformer (ViT), PyTorch, scikit-learn, Flask, React.js, Node.js</i> - Built a ViT-based deepfake image detector using PyTorch, achieving 93% accuracy with Hugging Face preprocessing. - Implemented an optimized Flask REST API with <code>torch.no_grad()</code>, CORS support, and robust error handling. - Deployed a scalable full-stack solution with a Netlify-hosted frontend, designed for CI/CD and containerization.
Email Scheduling Platform <i>React, Node.js, Express.js, BullMQ, Redis, PostgreSQL</i> - Built a full-stack platform to schedule and send bulk emails at user-defined future times. - Implemented Google OAuth and email/password authentication using Passport.js and session-based auth. - Designed a Redis-backed background worker system with BullMQ to process delayed jobs reliably.

TECHNICAL SKILLS

Languages: C++, Python, SQL, JavaScript, HTML, CSS.
Libraries: React.js
Frameworks: Node.js, Express.js.
Databases: MongoDB, MySQL.
Developer Tools: Git/GitHub, VS Code, Visual Studio.
Other Skills: API Design & Integration, REST APIs, JWT Authentication.
